

AI Workflow Audit

FlyRank Frontend AI Engineering Internship

Name: Kanak Chaudhary
Track: Frontend AI Engineering
Phase: Setup (FL-01)
Date: 11 July 2026

Introduction

I am currently pursuing a Bachelor of Computer Applications (BCA) while participating in the FlyRank Frontend AI Engineering Internship. Throughout my week, I balance college studies, internship assignments, coding practice, documentation, and personal learning. This workflow audit identifies which recurring tasks should remain my responsibility, which tasks can be completed with AI collaboration, and which can be delegated or automated. The goal is to build an effective, efficient, ethical, and responsible AI-assisted workflow. This audit will guide my AI collaboration strategy throughout the FlyRank Frontend AI Engineering Internship.

Weekly Task Classification

Weekly Task	Classification	Why?
College classes and self-study	Just Me	Learning and understanding concepts must be done personally.
Complete FlyRank internship assignments	Collaborate with AI	AI helps with ideas and reviews, but final work is my responsibility.
Write and improve README/documentation	Delegate to AI with Review	AI drafts faster, but I verify clarity and accuracy.
Debug HTML/CSS/JavaScript code	Collaborate with AI	AI suggests fixes while I test and understand the solution.
Practice DSA and coding questions	Just Me	Problem-solving skills improve only through personal practice.
Research frontend technologies	Delegate to AI with Review	AI summarizes concepts, but I cross-check important information.
Prepare college notes and revision	Delegate to AI with Review	AI creates summaries that I review before studying.
Build personal coding projects	Collaborate with AI	AI assists with planning and debugging while I implement features.
Organize weekly study schedule	Fully Automate	AI can generate and update study plans automatically.
Write professional emails or LinkedIn posts	Delegate to AI with Review	AI improves writing quality, but I personalize before sending.
Explore new music for focus	Fully Automate	AI can recommend playlists based on my preferences.
Brainstorm creative project ideas	Collaborate with AI	AI generates ideas while I choose and refine the best ones.

Three Target Tasks (FL-02 to FL-04)

Task 1: Documentation Improvement

Success Definition:

- README is clear and professional.
- No grammar mistakes.
- Easy for reviewers to understand.

Task 2: Code Debugging

Success Definition:

- Errors are resolved correctly.
- I understand every fix.
- Code runs successfully.

Task 3: Project Planning & Brainstorming

Success Definition:

- Clear project structure.
- Practical implementation plan.
- Achievable milestones.

AI Tools Setup Evidence

- ✓ ChatGPT Account Created
 - ✓ Claude Account Created
 - ✓ Anthropic Academy Enrolled
 - ✓ AI Fluency Course Started (2/15 Lessons Completed)
 - ✓ Claude Project Created
-
